ARMSTRONG OMOREGIE

Web Developer | Full-Stack Developer | Software Engineer

Github_ARMSTRONG-AISOSA | My Portfolio | Linkedin_Armstrong-Omoregie | ammycan6@gmail.com | +2349095466063 | Remote-Hybrid.

PROFESSIONAL SUMMARY

I am a seasoned remote professional, capable of collaborating across international time zones using asynchronous workflows to translate complex business requirements into scalable, production-ready code that drives global client growth. As a performance-driven Full-Stack Web Developer, I bring a strong foundation in web development using JavaScript, alongside core computer engineering principles using Python, Rusct and C. I utilise my knowledge in System Design for architecting responsive applications using TypeScript, React, and Next.js for high-fidelity frontends, backed by versatile backend experience spanning Express.js, Firebase, PostgreSQL, and Supabase. Additionally, I am highly proficient in managing local containerized development workflows via Docker and optimizing Linux-based environments.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, C, Rust, Html5, Css3, SQL
- **Frontend Development:** React, Next.js, React Native, Bootstrap, Tailwind CSS, Responsive Design, Material Ui, WordPress, Wix
- **Backend & Databases:** Express.js, Node, Firebase, PostgreSQL, Supabase, Relational Database Design, Prisma ORM, REST APIs
- **DevOps & Environments:** Linux (Mint/Debian), Docker, Git/GitHub, System Design, CI/CD Baselines
- **Design & Workflows:** Canva, Figma(UI Assets), GIMP (Graphic Layouts), Agile/Scrum, Asynchronous Documentation(Notion, Trello, Google Docs)

WORK EXPERIENCE

Full-Stack Developer | Brand-Eng Solutions | April 2025 – Present

A technology enablement and digital solutions hub delivering custom software, design, and marketing systems for small and medium-sized enterprises (SMEs).

- Shipped end-to-end web applications using TypeScript, React, and Next.js, enabling small and medium businesses to digitize and scale online to over 1000 users.
- Designed relational database schemas using PostgreSQL and Supabase, implementing secure row-level security (RLS) via Prisma ORM for managing over 200 unique items.
- Engineered robust server-side logic with Express.js and Firebase, building REST APIs with secure JWT authentication for over 1000 users.

- Streamlined local development workflows by containerizing environments with Docker on Linux platforms to ensure absolute server parity.
- Transformed Figma layouts into modular, responsive frontend components using Tailwind CSS and Material Ui.

Frontend Developer & Digital Specialist | Spruce Creative Hub | March 2023 – October 2024

A multi-disciplinary agency providing business consultancy, brand marketing, web development, graphic design, and print production services.

- Spearheaded frontend development for over 10 high-fidelity client websites using JavaScript, Html5, and Css3 to maximize cross-browser compatibility.
- Integrated dynamic backend services, optimizing data fetching and state handling to accelerate page load speeds.
- Translated brand marketing requirements into functional web layouts, directly boosting user engagement and client (buyers) conversion rates from 0.8% 1.5%.
- Managed visual layouts and UI assets using Canva and Figma, bridging the gap between raw graphic concepts and interactive code.
- Utilized Git/GitHub for version control, maintaining clean repository branches and smooth cross-functional collaboration.

Jr. Frontend Developer | Youlead Africa | May 2022 – March 2023

A premium business consultancy dedicated to youth empowerment, leadership development, and organizational growth frameworks across Africa.

- Maintained user-facing web platforms using clean, semantic Html5, Css3, and basic JavaScript.
- Built responsive web views and interactive forms to improve user journeys for regional consultancy clients, cutting page load time by more than 50%.
- Participated in monthly technical scoping sessions, converting direct client business feedback into functional UI updates.
- Executed cross-device testing and debugging to eliminate layout shifts and functional bugs prior, accelerating client handoff timelines by 100% compared to previous baselines.

PROJECTS

The Movie Flix

- Developed a responsive, high-fidelity movie database application utilizing React and modern JavaScript.
- Integrated external REST APIs to fetch and display up-to-date media metadata, optimizing state handling for seamless user browsing.

Technologies: Html5, Css3, JS, React

HooBank

- Built a modern landing page and interface for a digital payment platform featuring clean layouts and responsive transaction views.
- Utilized Tailwind CSS to convert visual assets into highly modular, pixel-perfect frontend components.

Technologies: Html5, CSS3, JS, React, Tailwind

GameRex

- Designed and developed an e-commerce platform layout tailored for gaming enthusiasts to browse games, gadgets, and merchandise.
- Focused on clean UI/UX structures and cross-device responsiveness to ensure accessible navigation.

Technologies: Html5, Css3, JS.

EDUCATION

Bachelor of Science (BSc) in Plant Biology and Biotechnology | 2019

University of Benin, Benin City, Nigeria

CERTIFICATIONS AND PROFESSIONAL TRAINING

Artificial Intelligence for Beginners | 2025 | by HP LIFE | Credential-Link
